Calyx RIM 7.1.10 Release Notes

Calyx RIM 7.1.10 Release Notes

The Release Notes contain information about updated files, resolved issues, and any open issues or workarounds in this release of Calyx RIM 7.1.10.

The details in these Release Notes supersede all similar details that appear anywhere else in this release of the product or its other documentation.

Calyx RIM 7.1.10 Resolved Issue

Calyx RIM 7.1.10 resolves the following issues.

Publishing

Issue	Description
DE29565 [INC0184222]	When a Japanese submission that included comma-separated values in the assembly was published, the fields Brand Name , Submission Type , Applicant , and Generic Name included in the xml output were incorrect. This issue is resolved. Now, all the fields mentioned above are included in the xml file correctly.
DE29710 [INC0200183]	After publishing an assembly, the generated stf.xml files included incorrect links. This issue is resolved.

Calyx RIM7.1 COB and Known Issues

For Clarification of Behavior (COB) and Known Issues, see: COB and Known Issues topics under Calyx RIM7.1 Release Notes (Cumulative).
