## Calyx RIM 7.2.2 Release Notes

### Calyx RIM 7.2.2 Release Notes

The Release Notes contain information about updated files, new functionality, resolved issues and any open issues or workarounds in this release of Calyx RIM 7.2.

The details in these Release Notes supersede all similar details that appear anywhere else in this release.

#### Application Updates

Calyx RIM 7.2.2 release introduces the following application updates:

- The ability to create an application from the *Product Family Attributes* page.
- The ability to create an application without the need to associate a product.

— Entities:

- Product Family (Application tab)
- Application (Create Application, Product tab)
- Events (Create Event, CT Shared Data)
- Search, Wizards, Security Administration

— Tabs:

- Applications (Applications grid, Set Filter)

— Home page:

- Countries and Product Family tree

#### New in Calyx RIM 7.2.2: Common Functionality

This table shows new features and enhancements of Calyx RIM 7.2.2 functionality.

Affected Area	Update	Benefit

Affected Area	Update	Benefit
Event	The CT Shared Data can now be associated to an event when there is no product assigned and application is created under the product family. See: <i>Entity Fields and Columns Added: Calyx RIM 7.2.2</i>	The ability to assign the CT Shared Data without adding the product to an event.
Create Application Wizard	The fields are updated in the <i>Create Application</i> wizard when associating a product. See: <i>Entity Fields and Columns Updated: Calyx RIM 7.2.2</i>	The ability to create applications via the wizard without products associations.
Create Submission Wizard	The <i>Create Submission</i> wizard fields are updated to enable associating a product. See: <i>Entity Fields and Columns Updated: Calyx RIM 7.2.2</i>	
Product Family	The <i>Product Family Attributes</i> page now includes the Create Application option. See: <i>Entity Fields and Columns Added</i>	The ability to create applications under product families with the ability to select products under this current product family create page.

## Entity Fields

### Entity Fields and Columns Added: Calyx RIM 7.2.2

Describes fields and columns that were added in this release including those that support the application updates.

#### Home

Table 1: Navigation Tree

Field/Column/Option Name	Field Type	Description	Business Rules
NOT DEFINED	Node	When you expand the <b>Select Entity Trees for Product Families or Countries</b> , the corresponding node is displayed under product families for the applications without associated products.	<p>The correct security rights should be selected.</p> <hr/> <p> <i>Warning: This feature is not available by default. For any requests to expose it, please contact your Business Development Representative for assistance.</i></p> <hr/>

**Search**

Table 2: Applications

Field/ Column/ Option Name	Field Type	Description	Business Rules
Products	Read-only text (populated automatically)	The <i>Search Results</i> page opened from <b>Search &gt; Applications</b> now includes the corresponding column.	<ul style="list-style-type: none"> <li>– If no product is associated with the application, the <b>Products</b> column is displayed with <b>No</b> value.</li> <li>– If any product is associated with the application, the <b>Products</b> column is displayed with <b>Yes</b> value.</li> </ul>

**Tabs**

Table 3: Applications

Field/ Column/ Option Name	Field Type	Description	Business Rules
Products	Read-only text (populated automatically)	When you select <b>Select Entity List &gt; Applications</b> on the left navigation pane, the corresponding field now appears as a column in the table view.	<ul style="list-style-type: none"> <li>– If no product is associated with the application, the <b>Products</b> column is displayed with <b>No</b> value.</li> <li>– If any product is associated with the application, the <b>Products</b> column is displayed with <b>Yes</b> value.</li> </ul>
Products	Option	When you select <b>Select Entity List &gt; Applications &gt; Set Filter</b> the corresponding field now appears as an option in the <b>Choose a Field</b> box.	When the <b>Set Filter</b> is used, only the applications with or without associated products are displayed in the <i>Applications</i> grid.

**Entities**

Table 4: Events

Field/Column/Option Name	Field Type	Description	Business Rules
CT Shared Data	Box, multi-select	The <i>Create Event</i> page now includes the corresponding field when you create an event for the CTA, CTR or IND applications.	The CT Shared Data can now be associated to the event for the application without a product.

**Product Family**

Field/Column/Option Name	Field Type	Description	Business Rules
Create Application	N/A	The <i>Create Application</i> option is added to the top right corner of the <i>Application</i> tab on the <i>Product Family Attributes</i> page.	The ability to create applications under product families with the ability to select products under this current product family create screen.

Entity Fields and Columns Updated: Calyx RIM 7.2.2

Describes entity fields that were changed in this release.

**Entities**

Table 5: Applications

Field/Column/Option Name	Field Type	Description	Business Rules
Associated Products	Multi-select, read-only text	This field has changed from mandatory to optional on the <i>Create Application</i> page when adding an application from <i>Product Family Attributes &gt; Applications</i> tab.	With the ability to create an application without a product associated or associate/disassociate a product from the <i>Products</i> tab of the <i>Application Attributes</i> page, this change provides the continued implementation of the uniqueness rules to identify entities within the new data model.

**Wizards**

Table 6: Create Application

Field/Option Name	Field Type	Description	Business Rules
Associated Products	Multi-select, read-only text	This field is changed from mandatory to optional on the <i>Create Application</i> page after selecting the <b>Reviewing Country</b> .	With the ability to create an application without a product associated or associate/disassociate a product from the <b>Products</b> tab of the <i>Application Attributes</i> page, this change provides the continued implementation of the uniqueness rules to identify entities within the new data model.

Table 7: Create Submission

Field/Option Name	Field Type	Description	Business Rules
Associated Products	Multi-select, read-only text	This field is changed from mandatory to optional when selecting <b>Create Submission &gt; Intitial Application &gt; Reviewing Country</b> .	With the ability to create an application without the a product associated and to associate/disassociate a product from the <b>Products</b> tab of the <i>Application Attributes</i> page, this change provides the continued implementation of the uniqueness rules to identify entities within the new data model.

## Security Administration Tables

### Security Administration Tables Updated: Calyx RIM 7.2.2

Security Administration tables, sections, or fields updated in Calyx RIM 7.2.2 release. These include the tables modified to support IDMP data capture.

#### Security Administration Section: Application Country Rights

Entity Affected	Column/Field Name	Value List Description
<ul style="list-style-type: none"> <li>— Product Family</li> <li>— Application</li> <li>— Product</li> </ul>	<ul style="list-style-type: none"> <li>— Product Families</li> <li>— Countries</li> <li>— Access Level</li> </ul>	<p>The <i>Application Country Rights</i> page is updated to have more security permissions using the Add button:</p> <ul style="list-style-type: none"> <li>— To use an orphan application, the NOT DEFINED must be set up for <i>Application Country Rights</i>. In this case no Product Families are selected and any option can be selected for Countries.</li> <li>— If the Product Families are NOT DEFINED, a product cannot be assigned to an application and the Application icon will not be available on the <i>Product Family Attributes</i> page.</li> </ul> <hr/> <p> <i>Warning: This feature is not available by default. For any requests to expose it, please contact your Business Development Representative for assistance.</i></p> <hr/>

## Resolved Issues: Calyx RIM 7.2.2

The following issues reported to Technical Support have been resolved. Issues are listed in descending order by their tracking numbers. Customer incident numbers that were recorded when the issues were reported are included in brackets [#####] following the tracking number.

If an issue was resolved in a previously released certified hotfix (CHF), that CHF build number is included.

**Registrations**

Issue	CHF/Hotfix Build	Description
DE29178; [INC0092523]	N/A	During the migration process, placeholder (pseudo) products were not associated to the events of CTA applications. This issue is resolved. Now, placeholder products are associated with the events with CT Shared Data of CTA or IND Applications.
DE28959	N/A	When creating a role in <i>Security Administration</i> , the values required for the XML Mapped Role field were missing. This issue is resolved. Now, the XML Mapped Role field includes a box with the values to select.
DE28990	N/A	Assigning different Registrations to the same Medicinal Product resulted in duplicate MAH value in the the IDMP tab Related MAH column. The issue is resolved. Now, no duplicate MAH values are created.
DE28575	N/A	When there were 200K or more products to select, the performance of <i>Product Select</i> widget was affected. The issue is resolved. Now the performance of the <i>Product Select</i> widget is increased.

**Addendum 2**

Issue	CHF/Hotfix Build	Description
DE29984 [INC0220440]	N/A	Using custom DCTM attributes in the folder name resulted in the errors after publishing as DCTM output location in the Document Attributes window was not recognized as a folder. This issue is resolved. The microservice dctm.connector 1.0.4 is updated to allow using custom attributes in the folder name for publishing.

**Addendum 3**

Issue	CHF/Hotfix Build	Description
DE29753 [INC0203009]	N/A	Power BI scheduled refreshing failed due to a table schema column error: The given ColumnMapping does not match up with any column in the source or destination., Source=System.Data. This issue is resolved. Now, Power BI scheduled refreshing completes successfully.
