## Calyx RIM 7.2.6 Release Notes

### Calyx RIM 7.2.6 Release Notes

The Release Notes contain information about updated files, new functionality, resolved issues and any open issues or workarounds in this release of Calyx RIM 7.2.6.

The details in these Release Notes supersede all similar details that appear anywhere else in this release of the product or its other documentation.

#### Secure File System Integration

Secure File System integration got enhanced security in response to the current client needs. It introduces:

- New auditing capabilities.
- All the components aligned in regards to configuration with a unified approach.

With these capabilities, you will now have the flexibility to work with remote file shares. The need to other tools for synchronizing the files share for distributed solutions is minimized.

#### OpenText Documentum Integration

To increase the efficiency and improve the collaboration between Documentum and Calyx RIM application, the following changes are introduced:

- DCTM Connector authentication mechanism is updated to use Single Sign On (SSO). With SSO you can access the requested resource using a single set of credentials.
- Calyx RIM is updated to save the credentials in secured vault. Credentials are no longer saved in the database.

### New in Calyx RIM 7.2.6: Common Functionality

This table shows new features and enhancements of Calyx RIM 7.2 functionality.

#### Technical Administration

Affected Area	Update	Benefit
Technical Administration	<p>The authentication types <b>Basic</b> and <b>oAuth</b> are introduced in this release and can be used when creating or updating the repository in <b>DMS Repository Management</b>. These authentication types are used for the content from DMS repository for all the active <b>Documentum Server</b> types using SSO as well as existing authentication method. See:</p> <ul style="list-style-type: none"> <li>– <i>Technical Administration Tables Added: Calyx RIM 7.2.6.</i></li> <li>– <i>Calyx RIM Administration &gt; Technical Administration &gt; Add a Documentum Repository to Calyx RIM</i></li> <li>– <i>Calyx RIM Administration &gt; Technical Administration &gt; Modifiable DMS Repository Attributes</i></li> </ul>	To increase the efficiency and improve the collaboration between Documentum and Calyx RIM, the new options are added to the <b>DMS Repository Management</b> .
	<p>File System Server is now Secure File System. Secure File System Integration updates are introduced in this release.</p>	To align all the technology solutions related to DMS connectivity and comply security standards, Calyx RIM now supports the file system connectors.

### New in Calyx RIM 7.2.6: Publishing

This table shows new features and enhancements of publishing functionality.

New features and enhancements for Publishing functionality are listed below.

Affected Area	Update	Benefit
Rendering 5.1	Rendering 5.1 will now work with docx TOC templates only. The doc TOC templates will not be supported starting with this release.	<ul style="list-style-type: none"> <li>– Stability improvement.</li> <li>– Ability to run multiple Generate TOC requests concurrently on a Rendering single server without conflicts with rendering any Microsoft Word documents.</li> </ul>

## List of Enhancements: Calyx RIM 7.2.6

Requested new features and enhancements are included in each release. The items are listed in descending order by their tracking numbers. Customer case numbers that were recorded when the enhancements were requested are included in brackets [#####] following the tracking number.

### Calyx RIM

Issue	CHF/Hotfix Build	Description
DE26164; [PRB0041149, PTASK0010527]	N/A	When an Excel document failed to render, Calyx RIM did not stop the Excel process that sometimes led to performance issues. The system now automatically stops these stray processes.
2605	N/A	It is now possible to set up the path for temporary files on Calyx RIM servers to Azure. For the details contact your Business Development Representative.

## Resolved Issues: Calyx RIM 7.2.6

The following issues that were reported to Technical Support have been resolved. Issues are listed in descending order by their tracking numbers. Customer incident numbers that were recorded when the issues were reported are included in brackets [#####] following the tracking number.

If an issue was resolved in a previously released certified hotfix (CHF), that CHF build number is included.

### Common

Issue	CHF/Hotfix Build	Description
DE29923; [INC0215705]	N/A	Trying to view list of products in <i>Application</i> window launched under <i>Product Family</i> took longer than expected. This issue is resolved.

Issue	CHF/Hotfix Build	Description
DE29756; [TASK0048010]	N/A	The cache storage for user role access (rolesAccessLevelCache) was restricted to 30 minutes. It is now possible to configure this parameter. It can be used to decrease server load in cases of large amount of users with complex security settings.

### Administration

Issue	CHF/Hotfix Build	Description
DE30062; [INC0219608, TASK0049184]	N/A	<p>In the <i>SPOR Master Lists</i> section, all the values for the following RMS lists were not displayed:</p> <ul style="list-style-type: none"> <li>– Anatomical Therapeutic Chemical Classification System - Human.</li> <li>– Medical Dictionary for Regulatory Activities.</li> </ul> <p>This issue is resolved. Now, mentioned above RMS lists display values correctly.</p>

### Rendering

Issue	CHF/Hotfix Build	Description
DE26170	5.0.1.1	SmartLinks in documents rendered by Documentum Content Transformation Services (CTS) were not present in the published output. This issue is resolved for Microsoft Office documents rendered by the CTS Doc6 plugin.
DE26166	N/A	<p>The links were not placed correctly when rendering the .x1s spreadsheets:</p> <ul style="list-style-type: none"> <li>– changing paper size from <b>Letter</b> to <b>A4</b> and orientation from <b>Portrait</b> to <b>Landscape</b></li> <li>– using <b>Fit to 1 page and wide by with null tall</b>.</li> </ul> <p>The issue with changing paper size and orientation is resolved. For the <b>Fit to pages and wide by tall</b>, we recommend to use any positive value except null.</p>
DE26161; [INC0041743]	4.4.1.11	When publishing multiple documents with different signatures, the signatures from one document were incorrectly applied to another document. This issue is resolved.

Issue	CHF/Hotfix Build	Description
4998; [INC0037216]	4.4.1.11	Publishing a Veeva document larger than 2GB failed. This issue is resolved.
4997; [INC0038898]	4.4.1.11	The first character of a link was placed in a different link box in the PDF rendition when the <b>Preserve Word Font Formatting</b> option was not selected. This issue is resolved.
4980; [INC0023819]	4.4.1.11	Adobe Acrobat displayed a warning message saying that the page may not be displayed correctly when viewing a published document containing links created using Linking plug-in (PDF). This issue is resolved.

## Calyx RIM 7.2 COB and Known Issues

For Clarification of Behavior (COB) and Known Issues, see: [COB](#) and [Known Issues](#) topics under Calyx RIM 7.2 Release Notes (Cumulative)

## Database Columns Changed: Calyx RIM 7.2.6

The following Database Columns were added, modified, or removed in this release.

Field Name	Field Size	Database Column Name	Database Column Size	Db Table Name
Repository User	N/A	USER_CODE	USER_CODE is deleted.	ODS.DMS_REPOSITORY
Repository Password	N/A	USER_PASSWORD	USER_PASSWORD is deleted.	ODS.DMS_REPOSITORY
D2 URL	N/A	DOMAIN	DOMAIN is deleted.	ODS.DMS_REPOSITORY

## Technical Administration

### Technical Administration Tables Added: Calyx RIM 7.2.6

Technical Administration tables, sections, or fields added in Calyx RIM 7.2 .6 release. These include the tables modified to support new types of authentication.

#### Technical Administration Section: DMS Repository Management

Entity Affected	Field/Column/Option Name	Value List Description
Repository	Authentication Type	The <b>Basic</b> and <b>oAuth</b> authentication types are introduced to enable access to Documentum repositories. These authentication types are available on the <i>Repositories</i> page for Documentum Server. You can access Calyx RIM using SSO or the existing authentication method.

### Technical Administration Tables Updated: Calyx RIM 7.2.6

List of Technical Administration tables, sections, or fields updated in Calyx RIM 7.2.6 to comply to the latest requirements.

#### Technical Administration Section: DMS Server Management

Entity Affected	Field/Column/Option Name	Value List Description
DMS Server	File System Server	This option is deactivated in Technical Administration > DMS Server Management > Servers > Server Type field. FileSystem is Secure File System now.

### Technical Administration Tables Removed: Calyx RIM 7.2.6

List of Technical Administration tables, sections, or fields removed in Calyx RIM 7.2.6 to comply to the latest requirements.

#### Technical Administration Section: DMS Repository Management

Entity Affected	Field/Column/Option Name	Value List Description
Repository	D2 URL	This field is removed from Technical Administration > DMS Repository Management > Repositories.
