Calyx RIM 7.2.8 Release Notes

Calyx RIM 7.2.8 Release Notes

The Release Notes contain information about updated files, new functionality, resolved issues and any open issues or workarounds in this release of Calyx RIM 7.2.8.

The details in these Release Notes supersede all similar details that appear anywhere else in this release of the product or its other documentation.

DaaS Updates

Calyx RIM 7.2.8 includes updated database schema. *See: Calyx RIM 7.2.8 Release Notes: DaaS Database Field and Columns Changed.*

***Note:** Links created in authoring mode via Linking plug-in (PDF)/Linking add-in(Word) and targeting documents in all supported file shares currently are not resolved in the published output. The same links created for documents in the Documentum as well as in-process and comment links are resolved as expected. This issue has already been documented before as DE30391. See: Calyx RIM 7.2.6 Release Notes, Known Issues*

Resolved Issues: Calyx RIM 7.2.8

The following issues that were reported to Technical Support have been resolved. Issues are listed in descending order by their tracking numbers. Customer incident numbers that were recorded when the issues were reported are included in brackets [#####] following the tracking number.

If an issue was resolved in a previously released sub- minor build, that build number is included.

Common

| Issue | Sub-Minor Build | Description |
|------------------------|-----------------|---|
| DE31074, [TASK0053554] | N/A | Trying to update a specific submission with applied overrides took longer time than expected. This issue is resolved. Now, the performance is improved. |
| DE31030, [INC0276375] | N/A | Trying to create a submission for an EU CTR application resulted in an error. This issue is resolved. Now, the submission is created successfully. |

| Issue | Sub-Minor Build | Description |
|-----------------------|-----------------|---|
| DE31013, [INC0276375] | N/A | In some 7.2.x versions of Calyx RIM, an option used for internal testing was exposed. The Terminology System List option was displayed under Data Administration > SPOR Master Lists . This issue is resolved with the removal of the Terminology System List option. |

Publisher

| Issue | Sub-Minor Build | Description |
|---------|-----------------|---|
| DE31122 | N/A | If file downloading was interrupted due to any technical issues, trying to download the same file later resulted in the <code>Invalid reference</code> error. This issue is resolved. Now, the file is downloaded successfully. |
| DE31057 | N/A | The DMS search on a folder that contained around 1000 or more documents took longer than expected. This issue is resolved. The performance is improved. |
| DE30973 | N/A | Publishing multiple assemblies at the same time resulted in the Job Status getting updated with a delay. This issue is resolved. Now, the delay is minimized. |
| DE30878 | N/A | Performance issue was experienced when creating a working assembly in an application with 1000 sequences added to the life cycle and multiple nodes in the Submitted view. This issue is resolved. Now, performance is improved |
| DE29594 | N/A | When a sequence with sequence code starting with the upper case P was created and the assembly was published, using Recalculating Checksum generates extra files in the output location. This issue is resolved. Now, Recalculating Checksum operation completes correctly and does not generate extra files. |

Addendum 2. Certified on Calyx RIM 7.2.8

| Issue | Sub-Minor Build | Description |
|---------|-----------------|---|
| DE31795 | N/A | Missing indexes in the database caused performance issue when trying to save entities after editing. This issue is resolved. Run <code>DB_update7_2_(7-8-9)_DE31795_0001.zip</code> script in addition to the main scripts during the migration procedure. The additional script must be run after the main script. See <i>Calyx RIM Database Migration Details</i> . |

Calyx RIM 7.2 COB and Known Issues

For Clarification of Behavior (COB) and Known Issues, see: [COB](#) and [Known Issues](#) topics under Calyx RIM 7.2 Release Notes (Cumulative)

DaaS Database Fields and Columns Changed: Calyx RIM 7.2.8

The following DaaS Database fields or/and columns were added, modified, or removed in this release.

| Field Name | Field Size | Database Column Name | Database Column Size | Database Table Name |
|--------------|------------|----------------------|----------------------|---|
| Default Flag | N/A | N/A | N/A | The APP_PRODFAM table is updated to display the new Default Flag field. If a product family is assigned to an application this field shows YES value. Otherwise, the value NO is shown. |
