## Calyx RIM 6.2.9 Upgrade Guidelines

Follow the upgrade guidelines to upgrade from version 6.2 .8 to version 6.2.9, along with supporting tools.

### Prerequisites

A new Calyx RIM Rendering license file must be installed in order to support the new EAEU request.

*Note: For installation assistance, please contact your Business Development Representative.*

### Important Notes for this Upgrade

These upgrade guidelines are current as of 11 Nov 2022 and can be used as a reference to upgrade your Calyx RIM.

Regulatory updates introduced in this release will require preceding procedures to be completed. Please read and carefully follow these instructions to ensure successful product upgrade.

There are no updates to Calyx RIM for Analytics 6.2.9. Use Calyx RIM for Analytics 6.2 CHF 7.

### Prepare to Upgrade

Please follow these instructions to ensure that your supporting tools are compatible with Calyx RIM 6.2.9.

Step	Action	Resource
1	Before starting the upgrade procedures, please review the Calyx RIM 6.2 System Support Documentation (SSD) to ensure that all system hardware and software components are compatible with the upgrade.	<a href="#">System Support Documentation</a>
	For general information about this release, see the Calyx RIM 6.2.9 Release Notes.	<a href="#">Calyx RIM 6.2.9 Release Notes</a>
2	Complete all the preceding installation procedures to upgrade your system to Calyx RIM 6.2.9, using appropriate upgrade packages. Refer to the documentation for every release for specific instructions, ensure corresponding pre and post- migration steps, if applicable.	Previous release documentation: <ul style="list-style-type: none"> <li>– <a href="#">Calyx RIM 6.2 Installation Guide</a></li> <li>– <a href="#">Calyx RIM 6.2 CHF 1 Installation Guide</a></li> <li>– <a href="#">Calyx RIM 6.2 CHF 2 Installation Guide</a></li> <li>– <a href="#">Calyx RIM 6.2 CHF 3 Installation Guide</a></li> <li>– <a href="#">Calyx RIM 6.2 CHF 4 Upgrade Guidelines</a></li> <li>– <a href="#">Calyx RIM 6.2 CHF 5 Upgrade Guidelines</a></li> <li>– <a href="#">Calyx RIM 6.2CHF 6 Upgrade Guidelines</a></li> <li>– <a href="#">Calyx RIM 6.2CHF 7 Upgrade Guidelines</a></li> <li>– <a href="#">Calyx RIM 6.2.8 Upgrade Guidelines</a></li> </ul>

Step	Action	Resource
4	Only the latest version of Linking plug-in (PDF) is supported.	You must apply Linking plug-in (PDF) v1.8.2.
5	The latest version of Calyx RIM Rendering supported for Calyx RIM 6.2.9 is 4.4 CHF 2.	You must apply Calyx RIM Rendering 4.4 CHF 2.

## Application Server

Step	Action	Resource
1	<p>Prepare to install a Calyx RIM 6.2.9 Application Server by completing the following applicable procedures:</p> <ul style="list-style-type: none"> <li>— Save copies of all files that are being replaced to another location, such as a shared network drive.</li> <li>— As a precaution, backup and save all files associated with your Calyx RIM system that you have modified, even if they are not listed in the instructions in the following topics and are not to be replaced during this upgrade.</li> <li>— For any customizable files included with this certified hotfix, such as properties files or template files, compare the new files to your existing files (by performing a diff procedure, for example) to determine whether changes were made that you need to carry forward to the new files.</li> <li>— If you have modified the standard overrides in Calyx RIM, contact Technical Support for assistance with preparing your overrides for this upgrade. XML changes will be required and some functionality may be impacted as a result.</li> </ul>	N/A
2	Install a Calyx RIM 6.2.9 Application Server by following instructions provided in the Calyx RIM 6.2.9 Application Server Installation Qualification script.	<a href="#">Calyx RIM 6.2.9 Application Server Installation Qualification</a>

## Complete the Upgrade

Step	Action	Resource
1	Complete Client Configuration according to the Calyx RIM 6.2.9 Client Installation Qualification script.	<a href="#">Calyx RIM 6.2.9 Client Installation Qualification</a>
2	<p>Post-installation procedures</p> <ul style="list-style-type: none"> <li>— Complete the post-installation tasks.</li> <li>— Create assembly templates from template files.</li> <li>— Ensure the most current versions of DTD files and template files are installed with Calyx RIM 6.2.9.</li> </ul>	<ul style="list-style-type: none"> <li>— <a href="#">Post-installation Tasks</a></li> <li>— <a href="#">Create Assembly Templates from Template Files</a></li> <li>— <a href="#">DTD Files</a></li> <li>— <a href="#">eCTD Template Files</a></li> </ul>

Step	Action	Resource
3	<p>To complete the upgrade process, use these links to the optional supporting tools.</p> <p>This is a list of the current, optional supporting tools as of the date this topic was updated. Other versions of these tools may be supported as well. Consult the Calyx RIM SSD for details on these versions.</p>	<ul style="list-style-type: none"> <li>– <a href="#">Linking plug-in (PDF)1.8.2 Installation</a></li> <li>– <a href="#">Liquent InSight Rendering 4.4 CHF 2 Installation.</a></li> <li>– <a href="#">Linking add-in (Word) 1.8.2 Installation</a></li> <li>– <a href="#">Liquent Cumulative View Builder 2.3 Installation</a></li> <li>– <a href="#">Calyx RIM 6.2 CHF 7 Analytics Server Installation and Update Installation Qualification</a></li> <li>– <a href="#">Liquent InSight Validator 5.1 Installation</a></li> </ul>

## Post-Installation Tasks

### Prerequisites

Before you use any installed sub-minor version of Calyx RIM 6.2 , you must perform post-installation tasks.

**Important:** After each upgrade, Calyx RIM drops and recreates all views. This affects all custom database objects that have been created and granted rights against any of the Calyx RIM database objects. This also affects each customized report (query) which may need to be recreated. If you have any customization applied, you will need to reload it after the upgrade is complete.

After you install the sub-minor version of Calyx RIM 6.2 :

1. Add any property customizations to the new properties files if required.
2. Create new assembly templates.
3. If you customized any template files before you installed the sub-minor version of Calyx RIM 6.2 , and you need to maintain the customizations, add your customizations after the sub-minor version template files are installed. Add any customized template files if required.
4. Clear temporary Internet files from your browser.
5. If you use Veeva, its temporary files accumulate on the application server and remain there until removed. To free up space on the server, delete the files from the temporary directory in the default location (C:\Users\`<Serviceaccount name>`\AppData\Local\Temp) and restart the server.

## Create Assembly Templates from Template Files

### Prerequisites

After you install each new sub-minor version of Calyx RIM 6.2 , create assembly templates from the template files that you import.

To create an assembly template from a template file:

1. From a Calyx RIM Web client workstation, log on to Calyx RIM.
2. If a version of the template file already exists in Calyx RIM, delete or rename the existing template file.
  - To delete the existing template - On the Calyx RIM home page, select the **Assembly Templates** tab, then choose the template. On the **More** menu, select **Delete** and then confirm the deletion.
  - To rename the existing template - On the Calyx RIM home page, select the **Assembly Templates** tab, then choose the template. Click the **Edit** icon, update the **Name** field, and click **Save**.
3. Navigate to the **Assembly Templates** tab, and then in the menu bar, click **New > Template**.  
The *Create Template* page appears.
4. Select **Assembly File**, browse to the location where you saved your new templates, and then choose the assembly template file.
5. Set **Use Source Assembly Publishing Settings Library** to **Yes**.
6. Set the **Import Publishing Elements** to **Yes**.
7. Click **Next**. The *Assembly Attributes* page appears for the template you created.

## DTD Files

To conform to the current submission specifications, you must update the DTD files to the latest version.

To make sure that you have the current version of each listed DTD file on your system, refer to the **Last Modified Build** column in the table. This column displays the product build number in which the file was introduced or updated.

Component	Customizable	Last Modified Build

## eCTD Template Files

Calyx RIM includes ICH-compliant eCTD templates with preconfigured folder types to capture the metadata for the specific headings in the eCTD that require additional information: drug substance, drug product, excipient, clinical indication, and regional administrative information.

To ensure that you have the current version of each listed template file on your system, refer to the **Modified/Introduced in Version** column in the **Template Files** table. This column contains information about the template status for every version in the Calyx RIM6.2 branch:

- **No** - template was not updated
- **Yes** - template was updated
- **New** - template introduced or updated
- **N/A** - template did not exist for the release

### Sample Templates

Calyx RIM includes additional assembly templates to enable the creation of reports or other electronic submission types. The following templates are samples for the publishing finishing options for overlays, Tables of Contents (TOC), and cover pages. Unicode (UC) templates for TOC, cover pages, and overlays are available (for A4 paper size).

- A4SampleTOCTemplate.docx
- SampleCoverPageTemplate.docx
- SampleOverlayTemplate.docx
- SampleTOCTemplate.docx
- UCSampleCoverPageTemplate.docx
- UCSampleOverlayTemplate.docx
- UCSampleTOCTemplate.docx

## Calyx RIM 6.2.9 IQ Scripts

PDF copies of the Calyx RIM 6.2.9 Installation Qualification (IQ) scripts are provided for guidance when installing or upgrading Calyx RIM.

### Prerequisites

A new Calyx RIM Rendering license file must be installed in order to support the new EAEU request.

---

*Note: For installation assistance, please contact your Business Development Representative.*

---

These PDF copies of the Calyx RIM 6.2.9 Installation Qualification (IQ) scripts are intended for use with the other reference information provided in the [Upgrade Installation Guidelines](#) topic.

- [Calyx RIM 6.2.9 Application Server Installation Qualification](#)
- [Calyx RIM 6.2.9 Client Installation Qualification](#)
- [Calyx RIM 6.2 CHF 7 Analytics Server Installation and Update Installation Qualification](#)
- [Calyx RIM 6.2 CHF 5 Analytics Server Upgrade Installation Qualification](#)
- [Calyx RIM 6.2 CHF 5 Analytics Server Upgrade Verification Installation Qualification](#)

As there are no updates in the database and additional configuration for Azure AD while upgrading from Calyx RIM 6.2.8 to Calyx RIM 6.2.9, the Calyx RIM 6.2.9 Database Server Installation Qualification and Azure Active Directory Configuration IQ scripts are not available for this release.

---

*Note: To obtain Installation Qualification scripts (IQ) in Word (.doc) file format, please contact your Business Development Representative.*
