Chapter 1. Ennov InSight Viewing 6.0 Release Notes

This document describes a general release that enhances Ennov InSight Viewing 6.0 (cloud only) to conform to the System for Cross-domain Identity Management (SCIM) integration model.

The Release Notes contain information about updated files, new functionality, and any open issues and workarounds in Ennov InSight Viewing 6.0.

The details in these Release Notes supersede all similar details that appear anywhere else in this release of the product or its other documentation.

Prerequisites

The users and groups using the Ennov InSight Viewing 6.0 system should have their accounts created in Azure AD.

Note: For data migration and installation assistance, please contact your Business Development Representative.

New in Ennov InSight Viewing 6.0

The following enhancements, functional changes, and updates are included with this release.

New Brand: Ennov InSight Viewing

Ennov InSight Viewing was formerly Liquent InSight for Viewing. The rebranded software user interface will appear in this release:

- All screens are displayed with the updated color theme.
- A new product name Ennov InSight Viewing is displayed for all the system messages (Import, Activate user, Comments, Auto registration and so on).
- The Print option has the Ennov InSight Viewing name in a title. **System for Cross-domain Identity Management (SCIM)**

The System for Cross-domain Identity Management (SCIM) replaces the Azure Active Directory Graph API used by Ennov InSight Viewing 5.5 versions to query users and groups from Azure Active Directory. The API endpoint will no longer respond to any calls to it. The changes include the following:

- Removal of all Azure AD Graph API calls from application logic.
- Transition of all Azure AD Graph calls to SCIM methods for groups and users.
- Removal of all current non Azure Idp providers (Okta, Ping) and LDAP.
- Removal of the database authentication mode.

Important: After June 30, 2022, Ennov InSight Viewing 6.0 Microsoft will deprecate the currently in use Azure AD Graph API used by Ennov InSight Viewing. This change is only relevant to cloud only Ennov InSight Viewing as a different solution is defined for on-premise Ennov InSight Viewing.

Login Page Updates

With the implementation of SCIM, security for user authentication when logging on is enhanced. For description of log in error messages, see *Login Page Error Messages*.

Updated Settings

With the implementation of SCIM, the Change Password option is no longer available in Ennov InSight Viewing 6.0 Settings. Please contact Azure AD administrator to change password.

The Settings tab is renamed to Profile.

Database Support

MSSQL is no longer supported.

Repository Type

LiveLink and SharePoint are no longer supported.

Migration Tool

As Ennov InSight Viewing is now Azure only, the migration tool is no longer required. For data migration and installation assistance, please contact your Business Development Representative.

Resolved Issues: Ennov InSight Viewing 6.0

The following issues reported to Technical Support have been resolved. Issues are listed in descending order by their tracking numbers. Customer incident numbers that were recorded when the issues were reported are included in brackets [#####] following the tracking number.

If an issue was resolved in a hotfix before the release, the hotfix build number is included in the table.

Issue	Hotfix Build	Description
1624; [INC0068963]	N/A	After performing the Application Vulnerability Assessment (AVA) scan on Ennov InSight Viewing application, the Cross-site scripting issues caused javascript window to open in some of the grids. These issues are resolved. The Javascript window does not appear in the grids now.

Ennov InSight Viewing 6.0 Known Issues

For Known Issues, see: [Known Issues](#) topics under Ennov InSight Viewing 6.0 Release Notes (Cumulative).

Chapter 2. Ennov InSight Viewing 6.0.1 Release Notes

This document describes a general release that enhances Ennov InSight Viewing 6.0.1.

The Release Notes contain information about updated files, new functionality, and any open issues and workarounds in Ennov InSight Viewing 6.0.1.

The details in these Release Notes supersede all similar details that appear anywhere else in this release of the product or its other documentation.

Resolved Issues: Ennov InSight Viewing 6.0.1

The following issues reported to Technical Support have been resolved. Issues are listed in descending order by their tracking numbers. Customer incident numbers that were recorded when the issues were reported are included in brackets [#####] following the tracking number.

If an issue was resolved in a hotfix before the release, the hotfix build number is included in the table.

Issue	Hotfix Build	Description
DE29230; [INC0140570]	N/A	<p>On the Add Application, Import Users, Content Indexing and some other pages, the values were not displayed in alphanumeric order. This issue is resolved. You can now view the sorted values in the alphanumeric order for the fields on the following pages and reports:</p> <ul style="list-style-type: none">– Add Application– Import Users– Content Indexing <p>Reports:</p> <ul style="list-style-type: none">– Comments Report– Review Matrix by User Report– Auto Registration Report
DE28987; [INC0140570]	5.5.0.8.0005	<p>On the User Group Report Filter page, the values in the <i>User Groups</i> were not displayed in alphanumeric order. This issue is resolved. The alphanumeric order sorting is now available for the values in every field on the <i>User Group Report Filter</i> and <i>Submission Navigator</i> pages. This change does not affect the Submission Type field in <i>Submission Navigator</i> only.</p>

DE28986; [INC0140564]	N/A	In large submissions, performance issue was experienced when using the + or – buttons to expand or collapse the sections. It resulted in an error message. This issue is resolved.
DE28304; [INC0090691]	N/A	In Ennov InSight Viewing, when trying to access the non-eCTD TOC document for a submission, the links could not be opened. This issue is resolved. You can now open the links successfully without any issues.
DE25989; [INC0060961]	N/A	When trying to assign more than fifty groups on the <i>Edit User</i> page, an error message was displayed. This issue is resolved. Now, it is possible to assign more than fifty groups in the <i>Edit User</i> page.

Ennov InSight Viewing 6.0 Known Issues

Details of the new features and functionalities introduced in Ennov InSight Viewing 6.0.3

Regulatory Updates

- Support for World Health Organization (WHO) eCTD v1.0 submissions.
- Support for European Union (EU) eCTD v3.1 submissions.

Chapter 5. Ennov InSight Viewing 6.0.4 Release Notes

The Release Notes contain information about updated files, new functionality, and any open issues and workarounds in Ennov InSight Viewing 6.0.4.

The details in these Release Notes supersede all similar details that appear anywhere else in this release of the product or its other documentation.

New in Ennov InSight Viewing 6.0.4

Details of the new features and functionalities introduced in Ennov InSight Viewing 6.0.4

Regulatory Updates

- Support for Ukraine (UA) eCTD v1.0 submissions.
- Support for Australia (AU) eCTD v3.2 submissions.

Ennov InSight Viewing 6.0.4 Resolved Issues

The following issues that were reported to Technical Support have been resolved. Issues are listed in descending order by their tracking numbers. Customer incident numbers that were recorded when the issues were reported are included in brackets [#####] following the tracking number.

If an issue was resolved in a hotfix before the release, the hotfix build number is included in the table.

Issue	Hot-fix Build	Description
92203	N/A	When searching in the Table of Contents, if there were no matching search values, Ennov InSight Viewing froze. This issue is resolved. Now, Ennov InSight Viewing does not freeze even if there are no matching search values.
90746; [TASK1162819]	N/A	For Japan (JP) M1, the section numbers continue to display even if the option Display Outline Numbers is not selected. This issue is resolved. Now, the section numbers are displayed.
90741; [TASK1153261]	N/A	Sequences of old CA DTD were not displayed on the Administrative Information window. This issue is resolved. Now, the sequences are displayed on the Administrative Information window.
DE32244	N/A	When a submission is selected as a search criterion on the Metadata search tab, using the Back to Search option on the Administrative Information page results in the submission value being lost in the Search Criteria . This issue is resolved. Now, the submission value continues to be displayed even when the Back to Search option is used on the Administrative Information page.

Issue	Hot-fix Build	Description
DE25980	N/A	On clicking a leaf, the leaf attributes Keywords did not show on the Properties tab. This issue is resolved. Now, the leaf attributes Keywords show on the Properties tab.

Chapter 6. Known Issues: Ennov InSight Viewing 6.0

The following issues were known at the time this document was published.

Issue	Affected Area	Description
DE28080 (Added on 28th of June 2022)	Comments Report	When using the Comments Report when there are two comments, it is not possible to delete or transfer the second comment within an application. Workaround: Select the Internet browser refresh icon and reselect the correct application. Then delete or transfer the next comment as required.
